UN Women's strategy to transform care systems in West and Central Africa

October 2024

WOMEN'S UNPAID CARE WORK IN WEST AND CENTRAL AFRICA

In Sub-Sahara Africa, women devote 3.1 times more time on unpaid care and domestic work than men on average (> 2.5 times, the global average).

62.7% of women in intra-African cross-border trade and 55% of women business owners in Africa spend between 2 and 5 hours per day on unpaid care and domestic activities.

Rural women in West and Central Africa are the most time-poor: Rural women can devote up to 12 hours daily to unpaid work. Rural women and girls are responsible for collecting water in 6 households out of 10.

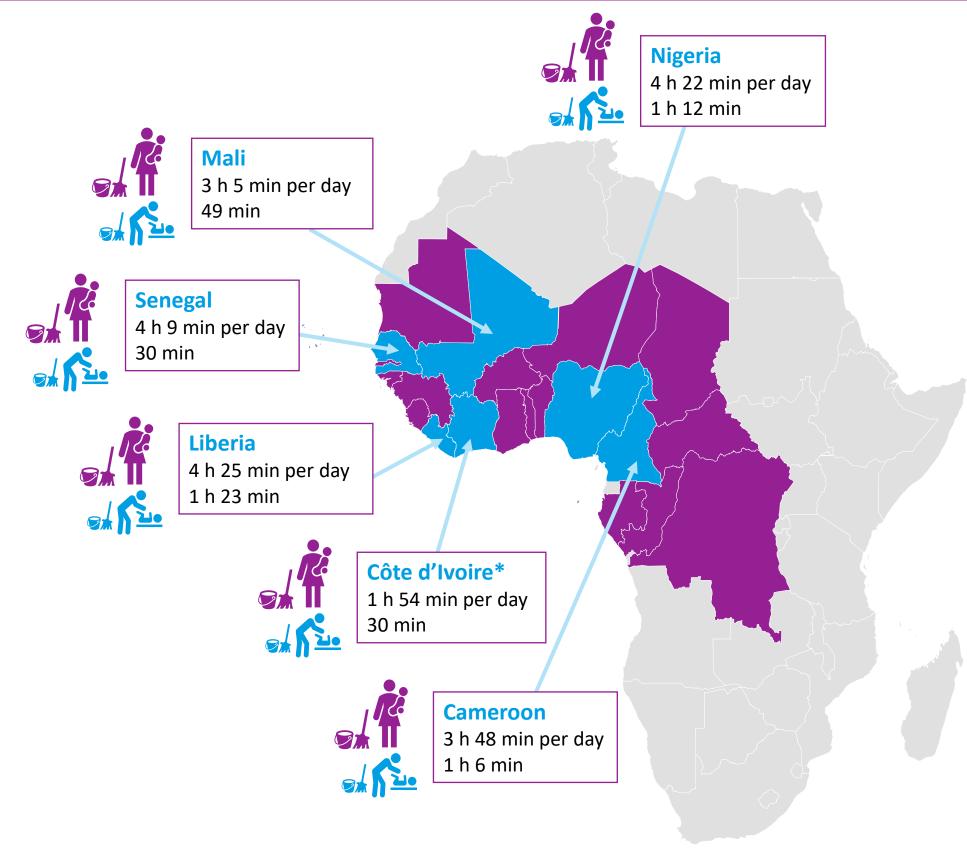

Climate change is intensifying rural women's care work increasing time spent collecting wood, and water because of deforestation and land degradation, as well as time spent caring for those who are sick as a result of climate induced diseases or natural disasters.

Population dynamics will impact women's unpaid care responsibilities: WCA Countries have a youthful population with 133.4 million children under 4 by 2050. At the same time, the number of elderly is rising with approximately 50 million individuals were aged 65 years and older as by 2050.

Across the region, unless decisive policy action is taken, women's unpaid care time is expected to increase from 3 hours 39 minutes in 2024 to 4 hours 8 minutes in 2050.

^{*} This data covers housework only

CHALLENGE 1: INEQUALITIES IN THE DISTRIBUTION OF UNPAID CARE WORK BETWEEN MEN AND WOMEN

CAUSES

Adverse Social norms:

 Patriarchy, social expectations, discriminatory social institutions, practices and stereotypes around gender roles make care to be perceived as a woman's job

Limited access to care/social infrastructure and services especially in rural areas (health centers, childcare centers, energy, water and sanitation, etc.)

Lack of adequate labour market care-supporting policies (maternal, paternal, and parental leaves; social protection schemes, etc.) In West Africa,
28.24 million women
who would like to work
are jobless, compared to
18.23 million men mainly
due to unpaid care
responsibilities.

RESULTING IN

Reduced women's participation in the labour market and increased gender equality:

• Lower-quality, low-pay, part-time, insecure and informal jobs for women

Limited choices, time, and opportunities for women in education, public life, and leisure:

- Lack of time to invest in education with implications for intergeneration transmission of poverty
- Underrepresentation in leadership and political spheres
- Intergenerational inequalities from mothers to daughters on care responsibilities
- Physical and mental health impacts on women

Reduced business productivity:

 Unpaid care responsibilities hamper women-led firms' productivity.

CHALLENGE 2: LACK OF ATTENTION AND LIMITED UNDERSTANDING OF THE CARE-DEVELOPMENT LINKAGES FROM POLICYMAKERS

CAUSES

Care Policy deficit

Only 1/3 of national social protection strategies in the SSA recognize unpaid care and domestic work and propose specific actions to reduce, redistribute or support it

Fiscal space for care is not seen as a priority

 Care as an economic contribution is not linked to growth in the development narrative and policymakers view care as an expenditure rather than an investment 14 out of 24 countries in West and Central Africa reduce public spending in 2024 disproportionately affecting programmes that primarily benefit women, including healthcare, education, water, and sanitation.

RESULTING IN

Reduced economic growth for countries

- of job creation and future fiscal revenue: investing in childcare and long-term care could generate 1 million new formal jobs in Côte d'Ivoire and Senegal and up to 17 million in Nigeria
- If valued, women's unpaid care work would account for 13.9% of GDP in Senegal and 17.6% in Mali

GAPS ANALYSIS OF THE CARE ECONOMY IN WEST AND CENTRAL AFRICA

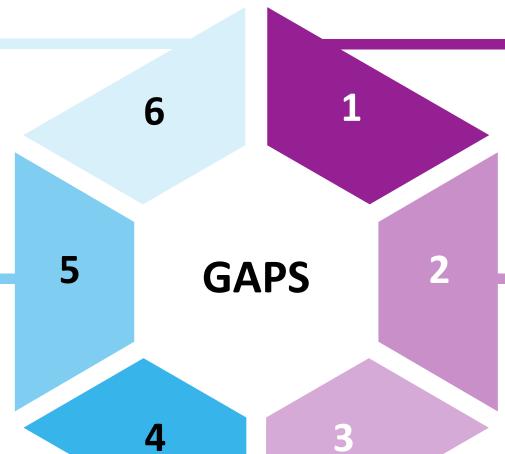

National and regional Spaces for learning, and dialogue for reform on care for policy makers, and advocates

SOLUTIONS

Solutions in terms of care models for women in rural areas and women informal workers in urban settings
 Adapted care policies for the WCA countries in the context of the polycrises

DATA

Data on time use and women's unpaid care work is scarce in general and in rural areas in particular

ANALYSIS

Economic and business case of care adapted to Low-Income Countries is not available

NARRATIVES

A strong narrative that links the actors, the analysis, the solutions and economic benefits is missing

ACTORS

Coordination failure: lack of cross-sectoral, and multi-stakeholder approaches to the care economy

UN WOMEN'S WEST AND CENTRAL AFRICA CARE STRATEGY

By 2030, in the West and Central Africa region

100,000
women and
girls with
access to care
solutions

150,000 lowcarbon decent direct, indirect and induced jobs created 10 legal
frameworks
strengthened
through
adoption of
care normative
changes

Increased access to unpaid care solutions for grassroots women and girls in rural and urban-poor areas in Low-Income Countries

Increased women-led care entrepreneurship for the provision of high-quality, accessible, affordable childcare, long-term and domestic care services in Middle-Income Countries

Enablers

Shift in Social Norms

Catalytic Finance for Care

Women-led solutions and innovations

Decent work for women

Approach

Data, research, and tools to build the economic case of care

Capacity-building of policymakers and advocates on care

Technical support to governments in formulating care policies and prioritizing care investments (local, national, regional level)

Convening national and regional spaces for advocacy, dialogue and reform

Co-development of locallyadapted care solutions with local partners and the private sector

SUMMARY: UN WOMEN'S WEST AND CENTRAL AFRICA CARE FRAMEWORK

Challenges

Imbalances distribution of unpaid care work

Lack of attention and limited understanding of the care-development linkages from policymakers

Impact of climate change and crises in the region

Approach

Data, research, and tools to build the economic case of care

Convening national and regional spaces for advocacy, dialogue and reform

Capacity-building of policymakers and advocates on care

Technical support to governments in formulating care policies and prioritizing care investments (local, national, regional levels)

Co-development of locally- adapted care solutions with local partners and the private sector

Pathways to action

Increased access to unpaid care solutions for grassroots women and girls in rural and urban-poor areas in Low-Income countries

Increased women-led care entrepreneurship for the provision of high-quality, accessible, affordable childcare, long-term and domestic care services in Middle-Income countries

Enablers

Shift in Social Norms	Women-led solutions and innovations
Catalytic Finance for Care	Decent work for Women

Impact by 2030

100,000 women and girls with access to care solutions

150,000 low-carbon decent jobs created

10 legal frameworks strengthened through adoption of care normative changes

UN WOMEN'S RESULTS ON CARE IN WEST AND CENTRAL AFRICA SINCE 2021

9,772 women farmers access timesaving climate-smart technologies for productive and domestic use in Senegal

Unpaid care work reduced for 6,600 families in Mali via access to improved cookstoves

6 municipalities in Senegal integrate care provisions and solutions into their Local Development Plans in 2023. 19 municipalities more being supported in 2024

7,000+ rural women and their household members enrolled for the first time in the national health insurance scheme, reducing time caring for sick

Improved capacity of 500+ local, national and regional stakeholders (government, civil society, unions, and research institutes, etc.) on the care-development nexus

3 regional Symposiums on Women's Economic Empowerment and the Care Economy in West Africa in 2022, 2023 and 2024

4 National Care multi-stakeholder policy dialogues in Senegal, Mali, Nigeria and Côte d'Ivoire

15 research pieces, knowledge products, tools, produced to develop operational solutions adapted to the reality of the region and to build economic case for care reform in West and Central Africa

Annex 1: UN WOMEN WEST AND CENTRAL AFRICA CARE ECONOMY STRATEGY: THE METHODOLOGY

Our Care strategy is shaped by three years of internal and external consultations with policymakers, women organizations, advocates, and stakeholders at the local, national, and regional levels.

- National multi-stakeholder Care policy dialogues in Côte d'Ivoire, Mali, and Senegal in partnership with the Ministry of Women's Affairs, Ministry of Population, and Ministry of Labour and Social Protection respectively
- Focus groups with grassroots women and municipal-level stakeholders dialogues on women's unpaid care in 13 municipalities in Northern Senegal
- Symposium on Women's Economic Empowerment and the Care Economy in West Africa 2022 and 2023 jointly organized by UN Women and IDRC with 250+ stakeholders from government, civil society, unions, and academia
- Bilateral meetings with regional and international institutions working on the care economy in Sub-Saharan Africa
- Internal consultations with UN Women care experts and women economic
 empowerment specialists at headquarters and across our 10 country offices as part of
 the development of the 'Transformative Approaches to Recognize, Reduce and
 Redistribute Work unpaid care work in women's economic empowerment' program and
 during the regional Women's Economic Empowerment Learning Week 2022 and 2023

Alignment with UN Women Strategic Plan 2022–2025: Outcome 1 (norms), and 4 (access to goods, services, and resources), its Gender Equality Accelerator on Transforming Care Systems, the Sustainable Development Goals 1.3; 5.4; 8.3 and the Economic Justice and Rights Action Coalition Pillar 1 on "Increasing women's economic empowerment by transforming the care economy"
